Current

### Senior Analyst

Capgemini Engineering, Gurgaon, Haryana

#### Project: Nokia WEBCT

Webct provides Web based Interface for Configuration of NOKIA 9500 Microwave Packet Radio (MPR), also coordinates between SGPA and IDU for seamless traffic flow.

#### Roles and Responsibilities:

- Developing Backend for features like NIP, OSPF Instance and MEG using Python.
- Designing and Development of UI using Javascript,Jquery,CSS,React.
- Updating existing features according to latest requirements.
- Unit Testing for developed features.

#### Project: Nokia MPR IDU

The 9500 Microwave Packet Radio (MPR) is a microwave digital radio that provides a generic, modular IP platform for multiple network applications (including 2G/3G/HSDPA/WiMAX backhauling to Metro Ethernet areas) to accommodate broadband services.

#### Roles and Responsibilities:

- To implement the feature of SR-TE in MSS-8 switch using C/C++.
- Update the existing features like MEP,MA/MEG according to latest requirements.
- Unit test cases for developed features.

## Personal Projects

Hindi

Very Good

KIIT University, Bhubaneshwar, Orissa

### **Remote Ambulance**

#### **Service(IoT,NodeJS,RaspberryPI)**

In this Project we developed a system which when installed in motor vehicles detect accidents automatically using various sensors, and informs the nearest hospitals with gps coordinates of vehicle.

#### **Chat Application(Javascript,Php)**

In this Project we developed a web based realtime chatting application, Which had multiple features like Media Sharing, Location Sharing etc. Frontend was developed using Html, CSS, Javascript and Backend was developed in Php.

## **Education**
